Software Engineer

Experienced Frontend Software Engineer with expertise in JavaScript, ReactJS and Web Technologies, complemented by a strong background in API Design, API management. An Open-Source enthusiast. Passionate about creating exceptional user experiences. Key skills include:

Programming | Software Development | Web Development | Testing
Leadership | Quality Assurance

Technical Skills

Programming Languages

JavaScript | Typescript | Python | HTML5 | CSS3 | PHP | Ruby

Front-end

ReactJS | NextJS | Styled-components | Redux | Microfrontends | WCAG | Figma | Material-UI

Back-end

ExpressJS | NestJS | Python Flask | Python Django | Firebase | AWS EC2 | Kubernetes

API Management

RESTful APIs | GraphQL | OpenAPI / Swagger | Async API | WSO2 API Manager (Core developer)

Testing & Code Quality

Jest | Cypress | React Testing Library | Git | Enzyme | Playwright | ESLint | Prettier | Lighthouse

Application Security

OpenID | JWT | CORS | OAuth2 | OWASP | Content Security Policy

CAREER EXPERIENCE

Amazon Web Services, Toronto, Canada

March 2023-June 2023

Front-end Engineer

- Worked as a front-end engineer of the SNS (Simple Notification Service) team.
- Integrated the Prettier code formatter to the SNS web console, enhancing efficiency in code reviews and ensuring consistent code styling.
- Added a set of End-to-End tests using AWS CloudWatch Synthetics for the Simple Notification Service to verify the functionality in the Edit subscription flow in the SNS console.
- Fixed customer reported bugs in the SNS console's web application.

WSO2, Colombo, Sri Lanka

November 2021-March 2023

Technical Lead

- Initiated and led the development of a new console web application for the SaaS platform Choreo.dev, which significantly improved performance, accessibility, internationalization, and interactivity.
- Developed a SPA authentication architecture by implementing the OAuth PKCE extension flow, resulting in significantly enhanced security and a performance improvement
- Developed an OpenAPI-based auto-mocking service that extends the Mock Service Worker for front-end test automation. This service enhances the developer experience and confidence in the test suite.

- simplified the state management architecture in the Choreo SPA console by using context and reducer hooks, thereby replacing some of the Redux usage.
- Developed a design system based on Material-UI that significantly enhanced the developer experience and ensured consistent product UI across the entire application.

WSO2, Colombo, Sri Lanka

July 2019-October 2021

Associate Technical Lead

- Improved the initial loading time and performance of the Choreo portal by utilizing Webpack's dynamic imports and React's lazy loading techniques to chunk the JS bundles.
- Integrated the Cypress library, configured Azure Pipelines, and developed end-to-end test cases, resulting in a significant improvement in reliability and overall developer experience. Composed Backend for Frontend micro-services utilizing control plain APIs, significantly enhancing centralized governance of APIs used in the frontend web app.
- Improved the static files and JS bundles caching by incorporating Webpack's chunk hashes and content hashing mechanisms, which eliminates the occurrence of stale content for users.
- Implemented a React application architecture that adhered to the logical separation of Pages, Components, Modules, Layouts, and Data.

WSO2, Colombo, Sri Lanka

February 2018-June 2019

Senior Software Engineer

- Developed an authentication and authorization framework for ReactJS web portals using OAuth 2.0's Authorization Code Grant flow, eliminating the need for an authentication proxy.
- Volunteered to integrate Algolia search into the product documentation portal and maintained it, improving site reach and enhancing document search user experience.
- As an on-site consultant, I provided guidance to customers on the implementation and use of the WSO2 API Manager product, addressing their API management and identity and access management requirements.
- Utilized Lighthouse and Axe tools to enhance the web console accessibility standard and ensure compliance with WCAG 2.0. As a result, successfully attracted public sector customers to the product.
- Developed an Apache JAX-RS interceptor to provide authentication functionality for REST APIs.

WSO2, Colombo, Sri Lanka

January 2016-January 2018

Software Engineer

- Designed and developed workflow support for Enterprise Store in WSO2 Governance Registry.
- Developed a new web portal for the WSO2 API Manager product using ReactJS. The implementation significantly improved the user experience and maintainability of the web portal.
- Implemented configuration and setup of a ReactJS-based Single Page Application (SPA) from scratch, utilizing essential tools such as Webpack, Babel, and ESLint.

EDUCATION

BSc (Honors) in Information Technology

University of Moratuwa, Sri Lanka

Physical Science, Mathematics

Royal College, Colombo, Sri Lanka
